Gauge Installation:

- 1. Select the desired mounting location of the instrument.
- 2. Depending on your mounting configuration, it might be necessary to program the gauge before installation.
- 3. Mount the gauge and secure with the included hardware. Tighten mounting nuts using 7mm or 9/32 wrench to 7inch lbs (finger tight plus ¼ turn).

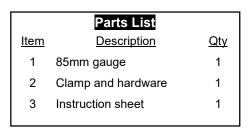

Wiring the Gauge:

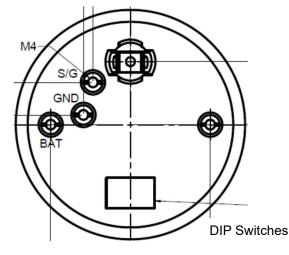

- 1. Route wires from the instrument to:
 - (a) Battery (+) switched power after the fuse box or user supplied 5A in line fuse to terminal "BAT".
 - (b) Light switch after the fuse box, or a user supplied 1A in line fuse after a switch to the light bulb.
 - (c) Ground location not shared with other electronics (such as battery negative terminal or direct to bus bar) to terminal "GND" and light bulb.
 - (d) Route the signal wire from the gauge (S/G) to the signal wire source location. This will be where the tachometer receives its signal from.

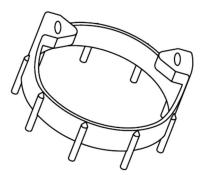

Terminal	Description
BAT	Switched power (12V)
S/G	Tachometer signal input
GND	Ground
